Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: although the general policy of the Office is not to permit the applicant to shift to claiming another invention after an election is once made and action given on the elected subject matter. Note that the applicant cannot, as a matter of right, file a request for continued examination (RCE) to obtain continued examination on the basis of claims that are independent and distinct from the claims previously claimed and examined (i.e., applicant cannot switch inventions by way of an RCE as a matter of right). When claims are presented which the examiner holds are drawn to an invention other than the one elected, he or she should treat the claims as outlined in MPEP § 821.03. However, in this instance, the Office deems the invention of claims 28-33 to be a species of originally filed invention I, claim 1 (similarly invention II of claims 2-27 were also deemed species of invention I). Regarding claims 28-33, the particular grip, operation button, circuit, and vibration motor as claimed is deemed patentable over prior art. Of note, Nishiumi discloses haptic or force feed back from a controller (memory) pack attached/replaceable to housing and Rosenberg discusses haptic/force feed back as vibrations, but none of the prior art teaches or suggests claimed combination of elements. Also of note is Yamaguchi that teaches a flattened cylindrical element and disk shaped button plate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
